## Mechanical Interface

measuring scale: mm

## Description

Advanced Coarse Sun Sensor (ACSS) is a device for sun-tracking and **attitude determination**. This sensor measures the incident angle of sun ray in two orthogonal axes, providing a high sensitivity based on the geometrical dimensions of the design.

ACSS sun sensor offers the highest **reliability and radiation hardness** for the most demanding LEO, MEO and GEO missions. ACSS technology has **flight heritage** since 2019 with hundreds of flight units delivered, and its manufacturing process has been developed and industrialized for **mass production**.

## Qualification Data and Flight Heritage

<b>Operating Temperature</b>	-55 to 105° Celsius
<b>Radiation test</b>	200 kRad (gamma) 8e11 10 MeV (protons)
<b>Mechanical test</b>	Shock 2000 g 18.3 g @ 20-2000 H
<b>Endurance test</b>	600 cycles from -55 to 105°C 2000h at 125°C
<b>EMC/ESD</b>	ECSS-E-ST-20-07C MIL-STD-461F

ACSS internal sensor with more than 2500 units in orbit since 2019.

## Technical Characteristics

<b>Sun sensor</b>	Double redundancy
<b>Type</b>	2 orthogonal axes
<b>Field of View</b>	±60°
<b>Accuracy</b>	<3° (3sigma, no calibrated)
<b>Electrical interface</b>	Analog, 15-pin micro connector
<b>Power supply</b>	15-30V, 3 mA
<b>Operating Temperature</b>	-45° to 85° Celsius
<b>Mechanical interface</b>	65 x 47 x 13 mm
<b>Mass</b>	40 g
<b>Housing</b>	Aluminum 6082 Alodine + Black anodizing
